

INSTRUCTIONS: Medical Center Hazard Vulnerability Assessment

Evaluate potential for event and response among the following categories using the hazard specific scale.

Issues to consider for **probability** include, but are not limited to:

- Known risk
- Historical data
- Manufacturer/vendor statistics

Issues to consider for **response** include, but are not limited to:

- Time to marshal an on-scene response
- Scope of response capability
- Historical evaluation of response success

Issues to consider for **human impact** include, but are not limited to:

- Potential for staff death or injury
- Potential for patient death or injury

Issues to consider for **property impact** include, but are not limited to:

- Cost to replace
- Cost to set up temporary replacement
- Cost to repair

Issues to consider for **business impact** include, but are not limited to:

- Business interruption
- Employees unable to report to work
- Customers unable to reach facility
- Company in violation of contractual agreements
- Imposition of fines and penalties or legal costs
- Interruption of critical supplies
- Interruption of product distribution

Issues to consider for **preparedness** include, but are not limited to:

- Status of current plans
- Training status
- Insurance
- Availability of back-up systems
- Community resources

Issues to consider for **internal resources** include, but are not limited to:

- Types of supplies on hand
- Volume of supplies on hand
- Staff availability
- Coordination with MOB's

Issues to consider for **external resources** include, but are not limited to:

- Types of agreements with community agencies
- Coordination with local and state agencies
- Coordination with proximal health care facilities
- Coordination with treatment specific facilities

The summary section will automatically provide your specific and overall relative threat.
